

OLD MILL HOUSE ACCESS STATEMENT

We are about 3 minutes up the A36 road from the Wilton roundabout towards Bath. The Old Mill House sign is visible on the roadside and well lit up at night time.

The entrance is lit by two lamps to the shingle driveway. We have ample parking for all guests which is covered by CCTV cameras.

From the lower shingle stone car park there is a short walk to the building. We have a safety railing around the millrace leading to the ground floor doorway which has a 10 inch step up to the tiled hallway.

The first double ensuite bedroom is situated to the right of the hallway. The bathroom has safety grab rails in the bathroom toilet suite.

Seven 7in steps lead to the main front door entrance, then 6 more to the kitchen door and one further step to the main large guest dining room. All stairways have strong wooden grab rails.

All rooms have a smoke alarm. There are safety night lights on all stairways and landings. There is a large bell in the main hallway for guests to call us at night time.

Thirteen 7in steps lead to the twin bedroom and one more across a small landing leads down a small corridor to the large double ensuite overlooking the millpond. The toilet has a safety grab rail.

The garden has a millpond with a low ironwork railing around the deepest part but the rest has no barrier so we ALWAYS ask that young children be supervised by adults at all times. We welcome disabled guests and ask them to contact us in advance to ensure satisfactory accommodation is available.
